8 Avenue Principal Pastour,
06600 Antibes

Languages

French (native)
English (C1 TOEIC)

Hobbies

Music (guitar)
Tabletop roleplaying
Video game development

Associative life

Club president at the
Bureau des Arts of
EURECOM

Education

- Currently studying at EURECOM (first year)
- 2 years in preparatory classes (MPSI then MP) at Lycée Charlemagne Paris
- Baccalauréat with highest honours

School presentation

EURECOM is a European engineering school and research laboratory in the digital field associated with the IMT (Institut Mines-Télécom).

Courses are delivered in English and around 70% of students come from a network of European universities. Students can choose between four majors : Cybersecurity, Data science, Internet of things and Inteligent communication systems. I am planning to choose data science.

Engineering projects

- A portable device to help visually impaired persons to avoid obstacles on their path (using neural networks for object detection).
- A file management system in C allowing a client to download and manage files stored on another machine as well as upload new files.

Programming languages

python

C

SQL
